

## EXAMPLES of Early Childhood Supplemental Curricula for Delaware Stars

*This is not meant to be an exhaustive list; programs may utilize other curricula, but must provide evidence of implementation*

Supplemental curricula for Delaware Stars programs are those resources that further grow children’s skill mastery in specific domains of the Early Learning Foundations (ELFs) and are referenced in Stars Standard LC2. The use of a supplemental curriculum should be based on the results of children’s learning outcomes that are acquired through the formative assessment process. Selection of supplemental curricula should consider the tool’s correspondence to the Early Learning Foundations, engage children in the active learning process and be in agreement with Delaware’s principles for best practice in curriculum development and implementation.

Below are **some examples** of supplemental curricula that are available for programs’ use in various domains.
